Environmental Stewardship

GSS is a Veteran-Owned Small Business supplier of laboratory products to the U.S. Government.

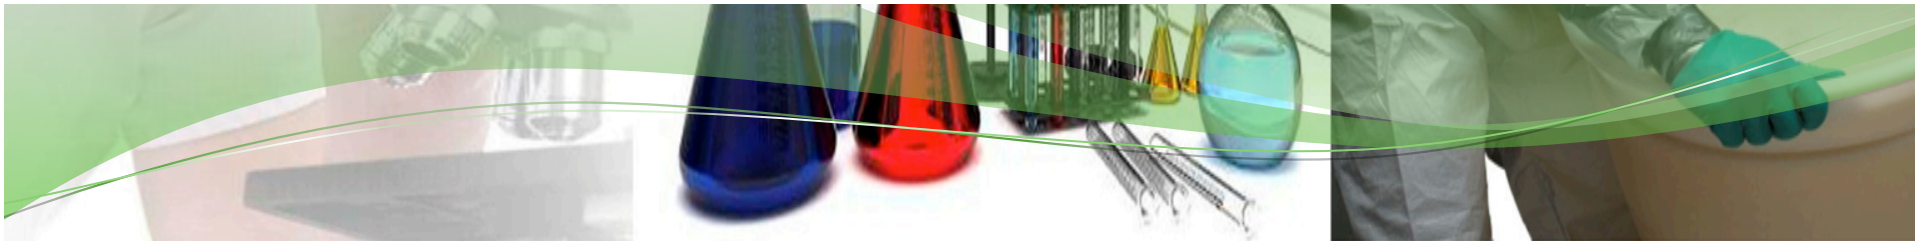

Our management is highly committed to environmental conservation and recycling

GSS actively seeks out vendors who offer environmentally green product solutions and items made from recyclable materials whenever possible.

Environmental Initiatives

- Partner with distributors and suppliers committed to sustainability programs
- Apply all guidelines and procedures in our business processes as written in the Environmental Protection Agency's (EPA) Comprehensive Procurement Guidelines (CPG) as it relates to purchasing items that contain recycled materials
- Support customers' environmental stewardship reporting requirements

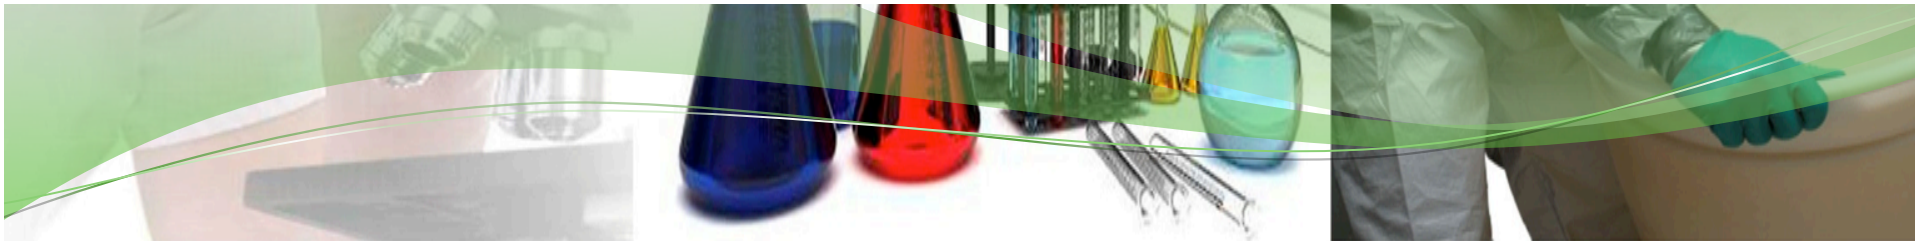

LBNL eCommerce Supplier

- Dedicated eCommerce Website for LBNL Since 2007

MSC

eco-friendly product categories

Green Cleaners and Fluids

MSC offers a wide variety of non-toxic, biodegradable cleaners, degreasers, and cutting fluids that have less of an impact on the environment. These products can help you maintain a healthy environment and are safer to handle and store.

Energy Conservation

MSC carries hundreds of products that can help you save energy, conserve our natural resources and support our overall goal of protecting the environment. Search hundreds of items, including energy-efficient lamps and lighting, photoluminescent signage and safety products, HVAC products, and automatic hand dryers. These great products conserve energy and can reduce your maintenance costs at the same time!

Water Conservation

MSC carries a host of plumbing fixtures and supplies that promote water conservation. Converting from manual on/off faucets to sensor-operated faucets controls water flow and operation time. Other products such as water-free urinals that create more hygienic, odor-free restrooms can reduce water usage and sewer costs.

Renewable Energy Source

Products that can be reused and kept out of the solid waste stream preserve the environment and sustain natural resources. MSC carries products such as power tools, flashlights, and two-way radios powered by rechargeable batteries that can be reused. Advantages of these types of products include longer life cycle, greater power performance, and no self-discharge. Using these products in your facility can help you preserve energy and, in turn, save you money!

Energy Star®

Energy Star is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy that promotes energy-efficient

consumer products. Energy Star products could dramatically save your company money while using less energy. Look for the Energy Star logo on select heating and cooling products and start saving!

NEMA® Premium

NEMA (National Electrical Manufacturers Association) established an energy-efficiency motors program that provides highly energy-efficient products for consumers. Choosing energy-efficient motors could save you money in total energy operating cost and will improve overall system reliability. Search MSC's NEMA premium products and upgrade your old motors!

Recycled Products

Every time you purchase recycled/recyclable products, you are helping to conserve the environment's natural resources, including trees, water, electricity, and oil. MSC can offer you a number of recycling solutions and products manufactured from post-consumer content, such as plastic recycling bins made from 30% post-consumer content, can liners, various paper products and fluorescent lamp recycling kits. Choose products that are made from recycled content to help preserve the environment.

Low VOC

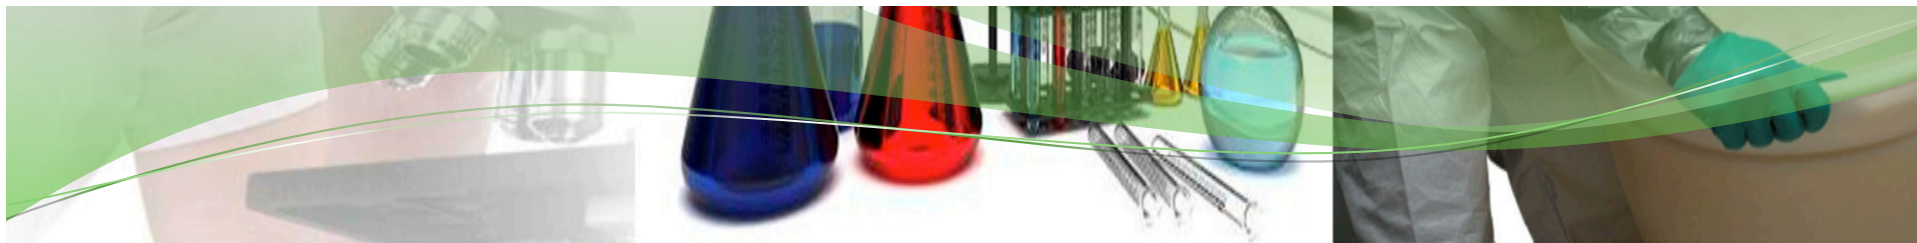

Traditional paints and finishes release low levels of harmful toxins into the air caused by a variety of VOCs (Volatile Organic Compounds). New environmental regulations in many states have prompted the development of low VOC paints and finishes that are less harmful to the consumer and the environment. Search our wide offering of low VOC items for safe, non-toxic products that are durable, provide great coverage and are cost-effective.

Greenhouse Gas Free

MSC Industrial Supply has many products that are Greenhouse Gas Free, meaning they do not contain any global warming agents. Try a Greenhouse Gas Free alternative today to help reduce the impact these types of products can have on the environment.

Finding your eco-friendly items just got easier...

EASY Access To Green Products

SIGMA-ALDRICH

- 4,000 Green SKU's and Growing
- Green Identified in Catalog and Website (Green Leaf and Eco-Friendly)

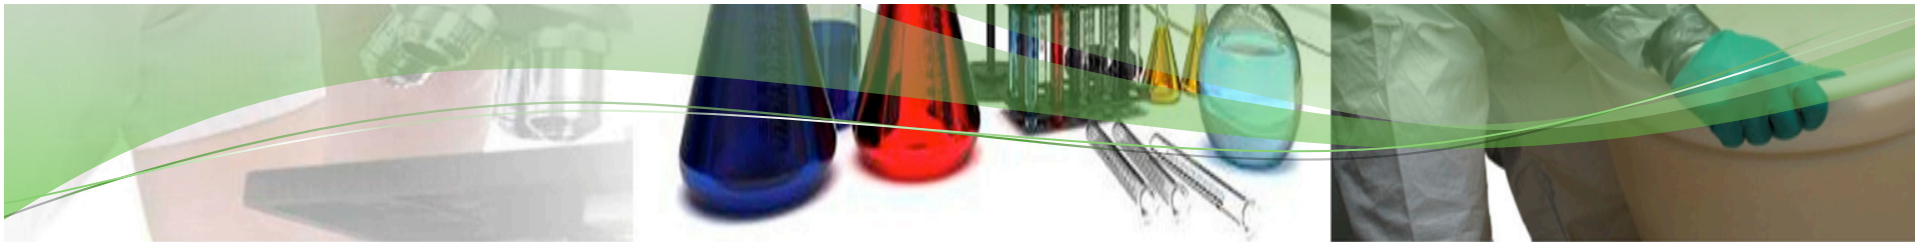

Look for the eco-friendly icon while shopping Sigma Aldrich to find environmentally friendly products. Items such as **polymers, catalysis, reagents, solvents, enzymes** can be found by clicking on Greener Alternatives/Greener Products button.

EASY Access To Green Products

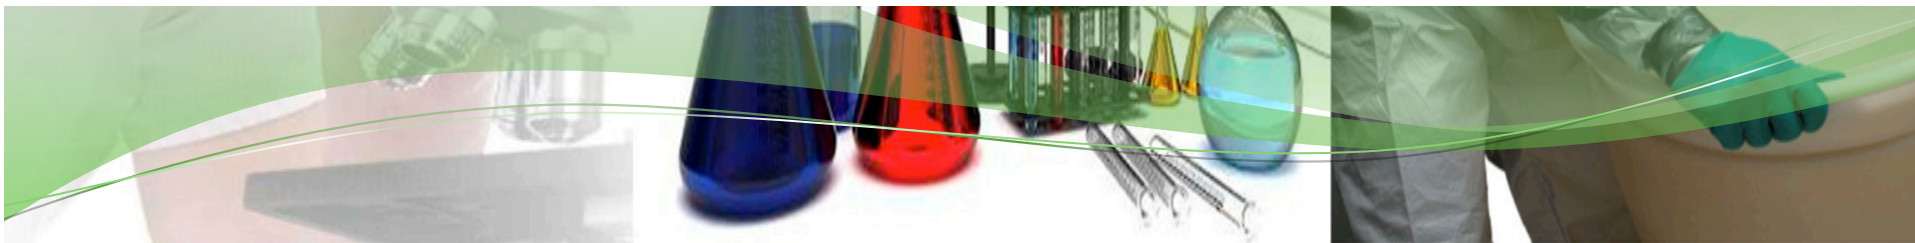

Bio-Rad reduces carbon footprints by applying more environmentally friendly business processes, producing more eco friendly reagents, and eliminating toxic materials from electronic components of products.

EASY Access To Green Products

With more than 40,000 products, EMD Millipore is one of the top suppliers of tools to the life science industry. They partner with customers to address today's sustainability challenges through products and solutions that offer environmental and social benefits, such as helping to reduce energy use during drug discovery and providing for product take-back and recycling.

EASY Access To Green Products

GET CLEAN. GO GREEN.

The Measure of Confidence

Turn this

Rotary Vane Oil Pump

Into this

Agilent Dry Vacuum Scroll Pump

Replace your conventional rotary vane backing or roughing pumps with Agilent scroll pumps. Eliminate the mess and hassle of oil-sealed vacuum pumps while reducing disposal and waste management issues.

Dry Vacuum Pumping

- ✓ Clean, safe work environment no danger of oil spills or leakage
- ✓ No system contamination from backstreaming oil
- ✓ Reduced maintenance intervals eliminate quarterly PM
- ✓ Eliminate environmental issues related to:
 - oil disposal
 - oil vapor management
- ✓ Eliminate vane seizure worries
- ✓ Clean, green, affordable vacuum pump solution

IDP Series Scroll Pumps

IDP-2 1.2 cfm (35 l/m)

IDP-3 2.1 cfm (60 l/m)

SH-112 Pump

SH-112 4.0 cfm (110 l/m)

TriScroll Pumps

TriScroll-300 8.8 cfm (250 l/m)

TriScroll-600 17.7 cfm (500 l/m)

TriScroll Inverter Pumps

TriScroll-300 8.8 cfm (250 l/m)

TriScroll-600 17.7 cfm (500 l/m)

Typical Applications

- Analytical instrument — Mass-pec/AA/GC
- Vacuum furnace/ovens
- Vacuum glove box
- General lab, “house” vacuum
- Vacuum freeze dryers
- Evaporators

Pipet Tip Box Recycling with TerraCycle

Recycle your empty, clean pipet tip boxes now with VWR & TerraCycle

VWR Helps You:

- Keep your tip boxes out of the landfill
- Reduce waste
- Improve your recycling efforts
- Achieve your own sustainability goals

TerraCycle will now make your waste into park benches and other products

From the Lab Bench to the Park Bench

New products are created- Waste from VWR customers will be used to make park benches in addition to other products

This program can help any labs using tips to reduce waste and increase recycling

TerraCycle melts plastic tip boxes and pelletizes to make new products

When labs fill boxes with clean, empty pipet tip boxes, they seal box and send back to TerraCycle

Labs can purchase cardboard boxes from VWR to participate in the program- Boxes come pre-paid with shipping

Conical Tubes & Pipet Tips

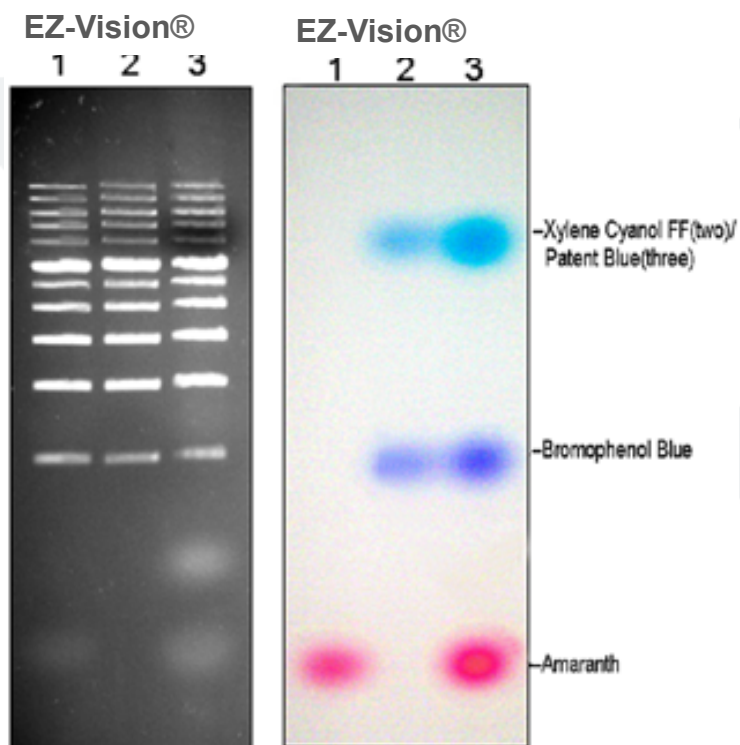

- Clear Polypropylene Construction
- Easy-to-Read, Black, Printed Graduations
- Tubes in Reusable, Freezable, Autoclavable Racks
- RNase-, DNase-, and Endotoxin-Free

- Packaging Manufactured from 100% Renewable Materials
- Refills Fit All Types of Pipettors
- 17 Different Tip Styles Available

Ethidium Bromide Alternative

Easy & Convenient

- Fluorescent DNA dye in a 6X loading Buffer

Performance

- Instant visualization with a standard transilluminator
- No post electrophoresis staining or de-staining

Safe

- Non-mutagenic
- Non-toxic for waste disposal

Energy Efficient Equipment

- Vacuum Thermal Insulation Technology Increases Storage Space
- Internal voltage regulator and voltage compensation system to ensure longer compressor life

- Purifier Logic Biosafety Cabinets utilize Electronically Commutated Motor (ECM) Technology, which precisely controls airflow without the need for airflow sensors.

Biosafety Cabinets

- **Energy Efficiency**

The ECM consumes 60% less energy than conventional motors.

- **Comfortable Working Temperature**

The ECM generates less heat than conventional motors for cooler working conditions.

- **Quiet**

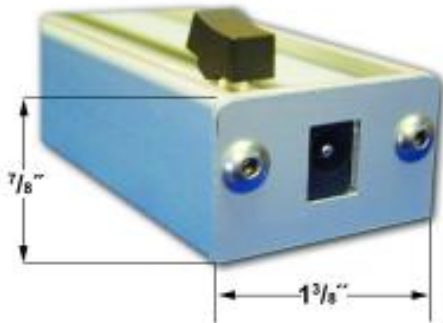

The ECM operates as much as 50% quieter than conventional motors.

- **More Power for Longer Lasting Filters**

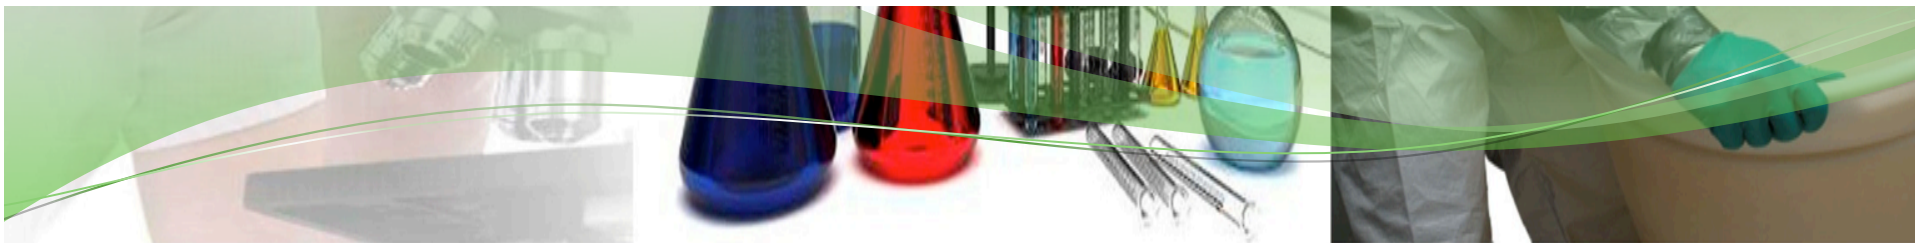

Because it has greater torque than conventional motors, the ECM overcomes more resistance from HEPA filter loading so filters last longer.

LED Lab Light

- PG LifeLink's LabLight is made from 95% recycled materials and Energy Star rated components.
- The aluminum housing efficiently manages heat from the high power LEDs and stays cool to the touch.
- The 50,000 hour LED service life makes the LabLight virtually maintenance free. Expected service life is 20 years @ 50 hours/week.
